

New KX-TDA0158 High Density DECT Cell Station

The New KX-TDA0158 high density DECT cell station allows businesses to cost effectively increase employee availability, eases customer's access, and enhances customer service by providing unhindered access to wireless telephony for up to eight (8) simultaneous DECT mobility users per cell. Multiple cell stations can be installed to allow more DECT handset users leverage from the excellent wireless solution.

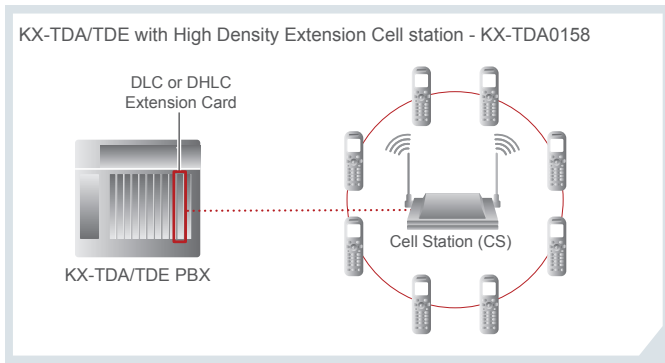

The high density cell station can be easily installed by simply connecting it to standard digital line cards and then pressing a button to register it with the associated TDA or TDE PBX.

High-density cell stations can be used to easily enhance DECT wireless coverage - allowing employees to roam freely and still be easily contactable.

Business mobility becomes a breeze - with Panasonic wireless mobility solution.

Extending Wireless Mobility

Extend the range of wireless communication with a High Density cell station that boosts the flexibility and mobility of multiple wireless handset. Automatic hand-over between installed wireless cells is provided - enhancing coverage and giving you true communication mobility even within large premises.

System Capacity

PBX	Max Number of High Density CS
