

DPH500 GSM DESK PHONE

The DPH500 is the latest addition to the DPH range of GSM desktop phones designed for the wireless office and home. It combines the simplicity of a landline phone with the flexibility of a mobile phone. Any standard mobile SIM is all that is required for connection to the network.

Anyone can install a DPH500 GSM Desk Phone and use it without having to read a manual. The large keys are easy to see and select without making a mistake. Just dial a number and pick up the handset for a fast connection. When it rings, just pick up the handset or press the hands free key.

The DPH500 includes many features that are not available on ordinary handheld phones but are essential to efficient phone communications. For example, Hotdial can automatically dial a preset telephone number when the handset is lifted, this makes it ideal for use as a customer service, taxi request, telecare or emergency phone.

Here are some locations that you could install the GSM Desk Phone:-

- Office and enterprise environments

- Hotels and restaurants

- Call centres, service centres

- Security phone

- Airports

- Garages and service areas

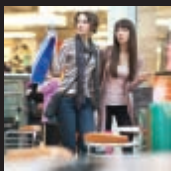

- Sea and river ports

- Railway stations

- Supermarkets

- Universities and colleges

- Shopping centres
