ATTENTION

Before using the device we strongly recommend to read this user manual.

Do not rip the device. Do not touch the device if the device is broken or its connecting wires are without isolation.

All wireless devices for data transferring may be susceptible to interference, which could affect performance.

The device is not water-resistant. Keep it dry.

The device requires high 230V AC voltage.

IMPORTANT NOTES!

It is mandatory to read the notes and manual carefully before starting to use the device.

SAFETY INFORMATION

In this document you will be instructed how to use GSM Desktop Phone safely. We suggest you to adhere to following recommendations to avoid any damage to person or property. You have to be familiar with the safety requirements before starting to use the device!

Device requires power supply source that satisfies all safety requirements listed in LST EN 60950-1 standard. Each power supply source should not exceed 15VA.

Socket RJ45 is used for device firmware upgrade. Only qualified personnel with proper equipment can upgrade the device.

Do not mount or serve device during a thunderbolt.

To disconnect power for the device please do the following:

- Plug off AC/DC power adapter from the wall outlet.
- Turn off using power on/off button.

To avoid mechanical damage of the device it is recommended to transport the device packed in damage-proof pack. Protection against over currents, short circuits and earth faults should be provided as a part of the building installation. Additional two pole protective device is required to protect from short-circuit and earth fault. The power of connected device should satisfy power of release device. The creepage distance between contacts should be no less than 3mm. While using the device, it should be placed so, that it would be possible to plug off AC/DC power adapter from the wall outlet.

Signal level of the device depends on the environment in which it is working. If the device starts working insufficiently only qualified personnel may repair this product. We recommend to send it to repair centre or to manufacturers. There are no exchangeable parts inside of the device.

GETTING STARTED

Package Contents

- A. Handset with cable
- B. Phone device
- C. Battery
- D. Power supply adapter
- E. External GSM Antenna
- F. USB Cable

Note: If any of the components are missing or damaged, please contact the retailer or reseller from which this product was purchased.

Inserting SIM card

Note: SIM card is mandatory for setting up connection to the GSM network. If you don't have a SIM card please contact your network service provider.

1. Unplug the power supply adapter
2. Open cover

3. Flip SIM card holder and gently insert SIM card in the slot

4. Close SIM card holder

Connect back up battery

Battery is under the same cover as the SIM card. To install the battery plug the battery connector in to the battery socket.

Connect handset

Connect one handset cable end to the handset and another one to the phone jack.

Attach antenna

Screw the antenna in a clockwise direction.

Position the antenna upwards at its connecting joint. This will ensure optimal reception.

Wall mounting

GSM desktop phone can be mounted on the wall. Device has two holes for mounting as shown in figure below:

To mount device on the wall please do the following:

1. Mark a location for two holes 115mm horizontally apart and drill two holes in the wall.
2. Install the screws (not supplied) into the wall, leaving a gap of approximately 3 mm between screw head and wall.
3. Mount the GSM desktop phone on screws.

Turning on GSM desktop phone

Before turning on the phone make sure that:

- SIM card is inserted
- Battery is connected (not necessary)
- Antenna is attached
- Handset is connected to the phone
- Power adapter is connected

After all these operations are done you can switch the phone on by pushing the power button on a back panel. After the device is switched on it will start up. LCD screen will display information that the phone is starting up. To turn off the phone press the same button again.

Connecting Handsfree earphones to GSM desktop phone

Plug in 3.5 mm earphone jack to device.

Earphones are used instead of internal deskphone handsfree speaker and microphone.

Connecting GSM desktop phone to personal computer

GSM desktop phone can be connected to PC for internet connection.

Power device on and wait until start up completes. Operator name on device LCD will indicate that start up is complete. Plug USB cable into PC and GSM desktop phone. Installation should start automatically within few seconds. If installation does not start automatically, go to My Computer and after several seconds you should see the drive named  Teltonika Desktophone (J:)

If drive has not appeared unplug and plug USB cable. If this does not help restart your PC. Double click on the drive icon that appeared to start installation.

PHONE OVERVIEW

1.1 Description of the phone

1.2 LCD screen icons

Black 2G/3G sign - indicates that connected to 2G/3G network.

White 2G/3G sign - indicates that 2G/3G network is available

Speaker - indicates that ring volume is turned off.

Signal strength - indicates strength of GSM signal. More bars indicate stronger signal.

Alarm - indicates that alarm clock has been set.

Message - Indicates received SMS. The number shows received SMS count.

Battery - Indicates the battery level. More bars indicate more power.

Speaker - Indicates that hands free function is turned on.

Date and time.

Ring - Indicates missed calls. The number shows missed calls count.

1.3 DPH401 menu structure

User friendly menu navigation allows reaching all GSM Desktop phone features.

Menu navigation

To enter menu press the functional **MENU** key.

Menu items are selected by using up and down arrow keys ▲ ▼ located below the LCD screen.

To enter selected menu function press left arrow key ◀ (LCD displays **OK**), to exit press right arrow key ▶ (LCD displays **Exit**).

Menu structure is shown below

To end a call place the handset back onto the cradle or press the speakerphone key if using the hands free feature.

SMS

GSM Desktop phone allows sending and receiving SMS text messages. Each SMS message can be up to 160 characters length. Contact your service provider to activate SMS service.

1.7 Read SMS

Read received message

When a new message is received icon "Message" on the LCD screen is displayed. To read the message press **Read**.

Read message from inbox

- Press the **MENU** key
- Select **Messages** and press **OK**
- Select **Inbox** and press **OK**
- Select message from the list by using arrow keys ▲ ▼ and press **Read**

Reply to received Messages

- View the desired message
- Press **Options** and press **OK**
- Select **Reply** and press **OK**
- Type the text using number keypad and press **Send**
- Press **Send** again

Forward text Message

- View the desired message
- Press **Options** and press **OK**
- Select **Forward** and press **OK**
- Enter the phone number or use **Phone book** to select an contact
- Press **Send**

1.8 Send SMS

- Press **SMS** key
- Type the text using number keypad and press **Send**
- Enter the phone number or use a **Phone book** to select contact
- Press **Send**

1.9 Delete SMS

- Press the **MENU** key
- Select **Messages** and press **OK**
- Select **Inbox** and press **OK**
- Select message from the list and press **Read**
- Press **Options** select **Delete** and press **OK**

1.10 Message Settings

Message Center

- Press the **MENU** key
- Select **Messages** and press **OK**
- Select **Message settings** and press **OK**
- Select **Service center** by and press **OK**
- Enter the number that your service provider gave you and press **OK**

*Note: If the number is already entered, press **OK**.*

Message Lifetime

- Press the **MENU** key
- Select **Messages** and press **OK**
- Select **Message settings** and press **OK**
- Select **Validity period** and press **OK**
- Using arrow keys ▲ ▼ select preferred message lifetime and press **OK**

Note: Message lifetime is the amount of time that an unread message will remain on the network server before being removed.

ADDITIONAL FEATURES

1.11 Date and Time Settings

Set the time

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Time and date** and press **OK**
- Select **Adjust time** and press **OK**
- Set time by using number keypad or arrow keys ▲ ▼ and press **OK**

Change the time format

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Time and date** and press **OK**
- Select **Time format**, select preferred time format and press **OK**

Set the date

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Time and date** and press **OK**
- Select **Adjust date** and press **OK**
- Set date by using number keypad or arrow keys ▲ ▼ and press **OK**

Change the date format

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Time and date** and press **OK**
- Select **Date settings** and press **OK**
- Select **Date format**, select date format by using arrow keys ▲ ▼ and press **OK**

Turn date display on the LCD screen On/Off

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Time and date** and press **OK**
- Select **Date settings** and press **OK**
- Select **Show date**, select **ON** or **Off** and press **OK**

1.12 Address Book

GSM desktop phone stores all contacts in the SIM card. Depending on the SIM card (SIM cards may have different memory capacities) phonebook is capable of storing up to 240 phone numbers with names.

*Note: To dial a number from the phonebook pick up the handset and press **Phone book**.*

Add new contact

- Press the **MENU** key
- Select **Contacts** and press **OK**
- Select **New contact** and press **OK**
- Enter name the by using number keypad and press **OK**
- Enter the number by using number keypad and press **OK**

Note: To input the “+” character press and hold “0” key.

Edit contact in the phone book

- Press the **NAMES** key
- Select contact by using arrow keys ▲▼
- Press **Options**, then select **Edit contact** and press **OK**
- Edit the name and press **OK** then edit the number and press **OK**

Delete contact

- Press the **NAMES** key
- Select contact by using arrow keys ▲▼
- Press **Options**, then select **Delete** by and press **OK**

Speed dialing function allows to quickly selecting saved number by using a number keypad keys (1-9). To program number keypad keys please do the following:

- Press the **MENU** key
- Select **Contacts** and press **OK**
- Select **Speed dial** and press **OK**
- Select wanted keypad number and press **Options**
- Select **Edit number** press **OK**
- Enter the number and press **OK**

1.14 Audio Settings**Increase/Decrease ring volume**

- Press the **MENU** key

- Select **Settings** and press **OK**
- Select **Sound** and press **OK**
- Select **Ring volume** and press **OK**
- Change ring volume by using arrow keys ▲▼ and press **OK**

Change ring tone

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Sound** and press **OK**
- Select **Ring tone** and press **OK**
- Select preferred ring tone by using arrow keys ▲▼ and press **OK**

Increase/Decrease message volume

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Sound** and press **OK**
- Select **Message volume** and press **OK**
- Change message volume by using arrow keys ▲▼ and press **OK**

Select message tone

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Sound** and press **OK**
- Select **Message tone** and press **OK**
- Select preferred melody tone by using arrow keys ▲▼ and press **OK**

Increase/Decrease speech volume

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Sound** and press **OK**
- Select **Speech volume** and press **OK**
- Change speech volume using arrow keys ▲▼ and press **OK**

Turn On/Off phone keypad tone

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Sound** and press **OK**
- Select **Key tone** and press **OK**
- Using arrow keys ▲▼ select *On* or *Off* and press **OK**

1.15 Alarm

The alarm feature can be used as an alarm clock. Alarm time and tone can be set for daily use or for one time only.

Set alarm time

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Time and date** and press **OK**
- Select **Alarm** and press **OK**
- Select **Alarm time** and press **OK**, then select *On* and press **OK**

- Set time using number keypad or by using arrow keys ▲▼ and press **OK**
- Choose repeat alarm or not (**On** or **Off**) and press **OK**
- If repeat- select days to by repeat alarm using arrow keys ▲▼ and pressing **Change**. When finished press **OK**.

Set alarm volume

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Time and date** and press **OK**
- Select **Alarm** and press **OK**
- Select **Alarm options** and press **OK**
- Select **Alarm volume** and press **OK**
- Change alarm volume by using arrow keys ▲▼ and press **OK**

Set alarm tone

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Time and date** and press **OK**
- Select **Alarm** and press **OK**
- Select **Alarm options** and press **OK**
- Select **Alarm tone** and press **OK**
- Select preferred alarm melody by using arrow keys ▲▼ and press **OK**

1.16 Language Selection

To select the language use following instructions:

- Press the **MENU** key
- Select **Settings** and press **OK**
- Select **Language** and press **OK**
- Select preferred language by using arrow keys ▲▼ and press **OK**

1.17 Dial delay

Dial delay is the amount of time, for the phone before automatically making a call after dial number is entered. To set the time use following instructions:
