

GET YOUR CUSTOMERS CALLING WITH A GSM TAXI PHONE

Install a GSM Taxi Phone at an airport, railway station, bus station, restaurant or supermarket and when customers need to book a taxi then they can simply lift the handset of the Taxi Phone and be connected directly to the booking office for FREE.

The Taxi Phone uses GSM technology so installation is quick and simple. All that is required is a wall in a convenient and prominent location to mount the Taxi Phone, a mobile phone SIM card and a mains power supply. The Taxi Phone is easily configured to automatically dial a single number when the handset is lifted making it easy for your customer to contact you and you can even change the number that the Taxi Phone automatically dials by sending a secure SMS message.

Getting new customers has never been easier and more cost effective than with the new GSM Taxi Phone.

Here are some locations that you could install the GSM Taxi Phone:-

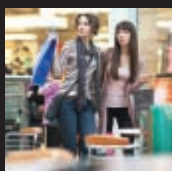

- Bus and coach stations
- Hotels and restaurants
- Clubs and casinos

- Airports
- Garages and service areas
- Sea and river ports

- Railway stations
- Supermarkets
- Universities and colleges

- Shopping centres
- Exhibition halls
- Hospitals and care homes
